#### INSTRUCTIONS

All measurements must be made with a ¼" flexible steel tape to the nearest one-eighth of an inch. Wherever is necessary to change direction of measurement, mark a control point, and swing tape at this point. To simplify addition, please enter fractional figures in eighths. Official measurements cannot be taken for at least sixty days after the animal was killed. Flexible steel cables may be used for measuring main beams.

**Supplementary Date** measurements indicate conformation of the trophy and none of the figures in line A, B and C are to be included in the score. Evaluation of conformation is a matter of personal preference.

- A. Number of Points on each Antler: To be counted a point, the projection must be at least one inch long, with the length exceeding width at one inch or more of length. All points are measured from tip of point to nearest edge of beam as illustrated. Beam tip is counted as point but not measured as a point.
- B. Tip to Tip Spread measured between tips of Main Beams.
- **C. Greatest Spread** measured between perpendiculars at right angles to the centerline of the skull at widest part whether across main beams or points.
- **D. Inside Spread of Main Beams** measured at right angles to the centerline of the skull at widest point between main beams. Enter this measurement again in "Spread Credit" column if it is less than or equal to the length of longer main beam.
- E. Total of Lengths of all Abnormal Points. Abnormal points are generally considered to be those non-typical in shape or location. It is very important, in scoring non-typical heads, to determine which points are to be classed as normal and which are not. To do this, study carefully the markings G-1, G-2, G-3 and G-4 on the diagram, which indicate the normal points. On the trophy to be scored, select the points which most closely correspond to these. All others over one inch in length (See A, above) are considered abnormal.
  - Measure the exact length of each abnormal point, over the outer curve, from the tip to the nearest edge of the beam or point from which it projects. Then add these lengths and enter the total in the space provided.
- F. Length of Main Beam measured from lowest outside edge of burr over outer curve to the tip of main beam.
- **G.** 1-2-3-4. Length of Normal Points Normal points project from the main beam. They are measured from nearest edge of main beam over outer curve to tip. To determine nearest edge (top)edge) of beam, lay the tape along the outer curve of the beam so that the top edge of the tape coincides with the top edge of the beam on both sides of the point. Draw line along top edge of tape. This line will be base line from which point is measured.
  - If more than 7 normal points exist add this extra point information in the remarks section on front of score sheet.
- H. 1-2-3-4. Circumferences if first point is missing, take H-1 and H-2 at smallest place between burr and second point. If fourth point is missing take H-4 halfway between the third point and beam tip.

**Drying Period:** To be eligible for entry in the Alberta Records a trophy must first have been stored under normal room temperature and humidity for at least 60 consecutive days after date of kill. No trophy will be considered which has in any way been altered from its natural state.

#### FAIR CHASE STATEMENT

To make use of the following methods shall be deemed as unfair chase and unsportsmanlike:

- 1. Spotting or herding game from the air, followed by landing in it's vicinity for pursuit;
- 2. Herding or pursuing game with motor-powered vehicles;
- 3. Use of electronic communications for attracting, locating or observing game or guiding the hunter to such game;
- 4. Hunting game confined by artificial barriers, including escape-proof fencing, or hunting game transplanted solely for the purpose of commercial shooting:
- 5. Or as may otherwise be deemed unfair or unsportsmanlike by the Trophy Committee of the Alberta Fish & Game Association.

#### **HUNTER AFFIDAVIT**

I certify that the trophy score during regulation hunting sea	on this chart was taken in fair chase and in accordance with the laws of the Province of Alberta and . Valid/Current WIN Card #
Date:	Signature of Hunter
